Project Description

This project is a personal website designated to showcase an overview of my life's journey such as education, experiences, skills, passions and my interest. The website is implemented to include a way of allowing users to contact me if it somehow ignites their interest. Also it shows the menu of my cooking. This project was created by using HTML, CSS, and JavaScript, with the intention to provide the visitors an engaging and interactive experience.

User Personas

1. Peers/Colleagues: Curiosity / to learn more about me
2. Hiring Managers/Recruiters: To inquire if I am eligible to fit the position. Gather information about my achievements and past experiences efficiently.
3. Clients: To hire/ to inquire about the food of my menu they have in mind. Interested in learning more about Chuanzhao Huang's capabilities for the potential project.

User Stories

1. As a friend, I would love to know more about Chuanzhao Huang, such as his interests and passions. I would like to learn if we can get alone or are like-minded with common interests. I want to take a look at the food that he cooked to gain inspiration or insights for my cooking skill.
2. As a client, I am considering hiring a web developer for a potential project. I want to see the showcase of his projects, skills, hobbies and experiences concisely. Depending on his capabilities, I will be able to determine if he will be be the right fit for my needs.
